Authors' Response to the Reviewers' and Editor's Comments

How to use (delete this box)

• Upload this document (PDF) together with the revised manuscript at the "Upload Revisions" step in OJS. It is forwarded to the reviewers, so **keep it anonymous**: no names, affiliations, or acknowledgements that reveal identities.

• Copy **every** reviewer and editor comment verbatim into the left column, then respond to each one. Every response states the **change made** and **where** (page/section/line in the revised manuscript), or the **scientific reason** when a suggestion was not applied.

• Mark the changes in the revised manuscript (highlighting or *Track Changes*) and say here how they are marked. Also upload a clean version without marks.

Manuscript number (OJS ID)	…
Manuscript title	…
Revision round	☐ Revision 1 ☐ Revision 2
Date of the editor's decision	DD Month YYYY
How changes are marked	e.g. yellow highlighting in the revised manuscript; a clean version is uploaded separately

Brief introduction

One or two paragraphs: thanks to the editor and reviewers, a summary of the most important changes (e.g. method clarified, additional analysis, discussion rewritten, references updated), and other changes made on the authors' own initiative.

Response to the Editor

No.	Editor's comment	Authors' response and change (location in the revised manuscript)
E1	Copy the comment	Response; change on p. …, section …
E2	…	…

Response to Reviewer 1

No.	Reviewer 1's comment	Authors' response and change (location in the revised manuscript)
R1.1	Copy the comment	We agree. … Change: … (p. …, section …).
R1.2	…	We understand this concern, but … (scientific reason). To clarify, we added … (p. …).
R1.3	…	…

Response to Reviewer 2

No.	Reviewer 2's comment	Authors' response and change (location in the revised manuscript)
R2.1	Copy the comment	…
R2.2	…	…
R2.3	…	…

Other changes on the authors' initiative

No.	Change	Reason and location
A1	…	…

We hope the revised manuscript now meets the expectations of the editor and reviewers, and we remain open to further improvements.
