How to use this template — v1.0, October 2026 (delete this instruction page before submitting)

• Write directly in this file. The paragraph styles already follow the guidelines: A4 paper, 2.5 cm margins, Times New Roman 12 pt, 1.5 line spacing, justified text.

• Use the **Heading 1/2/3** styles for section headings (1., 2.1., 2.1.1.), **Normal** for body text (1 cm first-line indent), **Caption** for table and figure titles, and **Reference** for the reference list (hanging indent). Fill the Manuscript Info / Abstract box by typing inside its cells.

• Grey-shaded text, like this, marks what you must replace. Italic instruction text is deleted.

• This manuscript will be reviewed double-anonymously. Do **not** write author names, affiliations, e-mail addresses, acknowledgements that reveal identities, or grant numbers in this file. Author details go on the separate *Title Page and Author Declaration* form and into the OJS submission system.

• Also remove identities from the file properties (Word: File → Info → *Check for Issues* → *Inspect Document* → remove *Document Properties and Personal Information*).

• Length 4,000–7,000 words excluding references; abstract 150–250 words; 3–5 keywords; citations and references in APA 7th edition.

• Save as **PDF** (File → *Save As* → PDF) and upload that PDF in the journal's submission system.

Manuscript for double-anonymous review
THESARA — Jurnal Kajian Multidisipliner
Anonymised manuscript — October 2026

Open access
Manuscript template v1.1

Research Article / Review Article / Conceptual Article / Interdisciplinary Study

Manuscript title: concise, informative, and representative of the principal subject (about 20 words at most)

Title in Indonesian

MANUSCRIPT INFO

Article type:
Research Article

Word count:
… words (excluding references)

Keywords:
keyword 1
keyword 2
keyword 3
keyword 4
keyword 5

3–5 keywords, lower case except proper nouns, alphabetical.

ABSTRACT

The abstract is a single paragraph of 150–250 words without citations, unexplained abbreviations, tables, or equations. It summarises the background and objective; the method (design, participants or data, analysis); the principal findings; and the conclusion and its implications. For conceptual papers and reviews, the abstract reflects the approach, the central argument, and the principal contribution.

Abstrak — Indonesian abstract, 150–250 words, equivalent in content to the English abstract above. THESARA is a bilingual journal: an English manuscript carries an Indonesian abstract and vice versa. The editorial office can assist with the translation on request.

Kata kunci: kata kunci 1; kata kunci 2; kata kunci 3; kata kunci 4; kata kunci 5

1. Introduction

The introduction presents the background of the problem, the research gap the study fills, the novelty and contribution of the study, and the objective or research questions stated explicitly. A review of the relevant literature is integrated here or placed in a separate section when needed.

In-text citations follow APA 7th edition: parenthetical citations such as (Author, 2024) or (Author & Author, 2023, p. 15), and narrative citations such as Author et al. (2022) for three or more authors. Every cited source must appear in the reference list, and every reference must be cited in the text. Self-citations are written neutrally (not "in our earlier study") so that the authors' identities are not revealed.

The last paragraph of the introduction usually states the objective of the study and outlines the structure of the article.

2. Research Method

Describe the research design, setting and period, population and sample or participants (including how they were selected), instruments and data sources, data-collection procedure, and data-analysis techniques, in enough detail for the study to be assessed and replicated. For review articles: describe the search strategy, databases, inclusion–exclusion criteria, and synthesis method. For conceptual articles: describe the approach and the basis of the argument.

2.1. Subsection (if needed)

Use subsections when the method has several stages or components. Subsection numbers follow the section number: 2.1, 2.2, and so on; sub-subsections such as 2.1.1 use the Heading 3 style.

If the study involves humans, animals, or personal data, state here that ethical approval and informed consent were obtained, without naming the approving body in this anonymised version (the body and approval number are given on the Title Page and added to the manuscript after acceptance).

3. Results and Discussion

Present the findings systematically, following the objectives or research questions, then discuss their meaning: relate them to theory and earlier research, explain agreement or divergence, and show the contribution. Results and discussion may be separated into two sections when that is clearer.

3.1. Tables

*Tables are numbered consecutively (Table 1, Table 2, …) with a bold label and a descriptive title **above** the table, are referred to in the text before they appear, and are real tables (not images). Only three horizontal rules (top, below the header, bottom) and no vertical rules. Sources or notes go below the table.*

Table 1
Descriptive table title.

Variable	Group A	Group B	p value
Variable 1	0.00	0.00	0.000
Variable 2	0.00	0.00	0.000
Variable 3	0.00	0.00	0.000

Source: Primary data, processed (2026). Note: explain abbreviations or symbols if any.

3.2. Figures

*Figures (charts, diagrams, photographs, maps) are numbered consecutively with a descriptive title **below** the figure, are referred to in the text, have sufficient resolution (at least 300 dpi for photographs), and remain legible in black and white. Text inside a figure is at least 8 pt. Third-party material requires permission and a source acknowledgement.*

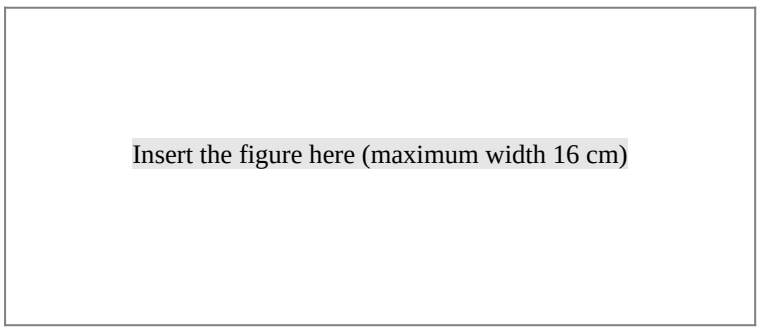

Fig. 1. Descriptive figure title.
Source: Authors' analysis (2026)

3.3. Equations and block quotations

Equations are typed with the equation editor, numbered at the right margin, e.g. (1), and referred to in the text as Equation (1). Direct quotations of 40 words or more are set as a block paragraph without quotation marks, indented 1.27 cm, with the page number of the source.

4. Conclusion

The conclusion answers the objective or research questions concisely without repeating the results, states the theoretical and practical contribution, acknowledges the limitations of the study, and suggests directions for further research. It is written as paragraphs, not as a bulleted list.

Acknowledgements

Leave empty in the anonymised review version. Acknowledgements, funder names, and grant numbers are given on the Title Page and added to the manuscript after acceptance.

Ethical Approval and Informed Consent

State, where applicable: "This study received ethical approval from the responsible ethics committee (name and number withheld for review) and all participants gave informed consent." If not applicable, write "Not applicable."

Conflict of Interest Statement

The authors declare no financial or non-financial conflict of interest related to this manuscript. — or — The authors declare the following relationships: …

Author Contributions

In the anonymised version use "Author 1", "Author 2", etc. Example: Author 1: conceptualisation, methodology, writing – original draft. Author 2: data analysis, visualisation, writing – review and editing. All authors have read and approved the final manuscript.

Data Availability Statement

State where the supporting data can be obtained, e.g. "The data that support the findings of this study are available from the corresponding author upon reasonable request" or "The data are available in the … repository (DOI/URL withheld during review)". If not applicable, write "Not applicable."

Declaration on the Use of Artificial Intelligence

If generative AI tools were used to generate or substantially develop scholarly content, name the tool, its version, and what it was used for. Light language editing need not be disclosed. If none was used, write "No generative AI tool was used in preparing this manuscript."

References

The reference list follows APA 7th edition: alphabetical by the first author's surname, hanging indent of 1 cm, DOIs written as https://doi.org/… links when available, and not divided by source type. Prefer primary sources and recent literature. The patterns below are format examples; replace them with real sources and delete the examples.

Author, A. A., & Author, B. B. (Year). Title of the article: Subtitle if any. *Journal Name, Volume*(Issue), first page–last page. https://doi.org/xx.xxxx/xxxxx

Author, A. A. (Year). *Title of the book: Subtitle* (nth ed.). Publisher Name. https://doi.org/xx.xxxx/xxxxx

Author, A. A., & Author, B. B. (Year). Title of the chapter. In C. C. Editor & D. D. Editor (Eds.), *Title of the book* (nth ed., pp. xx–xx). Publisher Name.

Author, A. A. (Year). *Title of the thesis or dissertation* [Master's thesis/Doctoral dissertation, Name of University]. Repository Name. https://url

Author, A. A. (Year, Month Day–Day). *Title of the paper* [Paper presentation]. Conference Name, City, Country.
